

SwiftLink® 2740 Baseband Network Package

An Innovative Baseband Network Package

To allow small teams to simultaneously access multiple levels of secure communications, TeleCommunication Systems, Inc. (TCS) introduces the SwiftLink® 2740, an innovative baseband network package providing three levels of classification in a rugged, highly portable design.

The SwiftLink 2740 features removable modules for red and gray levels of classified access. The distinctive configuration provides enhanced access to classified communication channels through the red and gray modules, while assuring up to six feet of physical separation between the modules and the NIPR sub-system. Users of the SwiftLink 2740 discover that its leading-edge design allows for an intuitive setup that guarantees ease-of-use for remote communicators.

Features and Benefits

- Packaged in a Pelican 1510 case (22x13.8x9in.) which meets the requirements for airline carry-on luggage
- At 48 lbs, ideal for small-team transportation
- Cisco MAR 3230 router provides voice connectivity on each side
- SecNet 54 encryptors on red and gray side provide HAIPSE compliant encryption, and the MAR provides for FIPS 140-2 TRANSEC
- Interoperable with any Ethernet-based platform
- Fully interoperable with any IP-based encryption device
- COMSEC: SecNet 54
- Operates at 110/220 VAC or 14 - 36 VDC
- Operational Temperature: 55°C

Versatile best-of-breed communications package

Uniquely designed to enable multiple levels of functionality in a small footprint, the SwiftLink 2740's modular, highly integrated form factor supports the voice and data requirements of deployed users at various classification levels. The Cisco Mobile Access Router manages the NIPR and both SIPR requirements of the network package with ease and transparency. The Cisco router enables voice and data connectivity on each module, with 8 IP-phones each supported on the red, gray, and black sides, as well as 2 analog phones supported on the black side. The SwiftLink 2740

allows small teams the security of separate classified systems in the convenience of one compact network communications package.

Field Proven Applications

TCS' SwiftLink suite of deployable communications devices offers indispensable attributes including Everything over IP™ capabilities, secure/encrypted communications, durability, quick and easy setup, and highly transportable form-factor. Teams requiring immediate access to multiple levels of classified communications capabilities in a remote environment find the SwiftLink 2740 offers the features to support their IP telephony, video and data needs.
