

Comtech Telecommunications Corp. Receives \$2.8 Million Delivery Order to Support U.S. Navy's Advanced Time Division Multiple Access Interface Processor Terminals

August 15, 2018

MELVILLE, N.Y.--(BUSINESS WIRE)--Aug. 15, 2018-- August 15, 2018-- Comtech Telecommunications Corp. (NASDAQ: CMTL) announced today that during its fourth quarter of fiscal 2018, its Tempe, Arizona-based subsidiary, Comtech EF Data Corp., which is part of Comtech's Commercial Solutions segment, received a delivery order in support of a recently awarded contract to provide long-term support for the Advanced Time Division Multiple Access (TDMA) Interface Processor (ATIP) production terminals in support of the Space and Naval Warfare Systems Command (SPAWAR). This latest delivery order against the 10-year, \$19.1 million follow-on IDIQ contract is for \$2.8 million, and has an initial funding level of \$1.6 million.

ATIP is a Layer-2 Ethernet bridging device installed on ship, shore and submarine platforms in the Navy Multiband Terminal (NMT). The ATIP program provides significant improvements to the Advanced Extremely High Frequency (AEHF) system's performance through dynamic bandwidth management, support for higher XDR data rates, and increased throughput.

"This new delivery order is to complete the development of an ATIP Terminal Direct (TD) mode that will enable the full capabilities of our previous Adaptive Coding development effort," commented Fred Kornberg, President, and Chief Executive Officer of Comtech Telecommunications Corp. "The ATIP TD mode will allow the Navy to operate at very low Code Rates to maintain communication links in impaired environments."

Comtech EF Data Corp. is the recognized global leader in satellite bandwidth efficiency and link optimization. The advanced communication solutions encompass the Heights Networking Platform, Advanced VSAT Solutions, Satellite Modems, RAN & WAN Optimization, Network & Bandwidth Management and RF products. The Company is recognized as a technology innovator, and has a reputation for exceptional product quality and reliability. The solutions enable commercial and government users to reduce OPEX/CAPEX and to increase throughput for fixed and mobile/transportable satellite-based applications. For more information, visit www.comtechedata.com.

Comtech Telecommunications Corp. designs, develops, produces, and markets innovative products, systems and services for advanced communications solutions. The Company sells products to a diverse customer base in the global commercial and government communications markets.
