## **Comtech Telecommunications Corp. Receives \$1.3 Million Modem & Frequency Converter Contract Award to Support Network Expansion in Asia**

MELVILLE, N.Y.--(BUSINESS WIRE)-- **June 28, 2012**--Comtech Telecommunications Corp. (NASDAQ: CMTL) announced today that its Tempe, Arizona-based subsidiary, Comtech EF Data Corp., received a \$1.3 million follow-on contract award for satellite ground equipment from an existing government customer. The order specified two models of Modems and Frequency Converters, which will be deployed to support a network expansion in Asia.

The CDM-625 Advanced Satellite Modem and the CDM-700 High-Speed Satellite Modem were ordered. The CDM-625 combines advanced forward error correction with DoubleTalk<sup>®</sup> Carrier-in-Carrier<sup>®</sup> bandwidth compression for maximum savings. DoubleTalk<sup>®</sup> Carrier-in-Carrier<sup>®</sup>, based on Raytheon Applied Signal Technology's patented "Adaptive Cancellation" technology, allows transmit and receive carriers of a duplex link to share the same transponder space. The combination of advanced technologies enables users to minimize OPEX/CAPEX and maximize throughput/availability without using additional transponder resources. The CDM-700 is a high-speed modem intended for operation with a range of multi-port data interfaces. The modem operates in broadcast, circuit restoration, point-to-point and point-to-multipoint applications with exceptional power and bandwidth efficiency. Also purchased were C-Band and Ku-Band Synthesized Frequency Converters that meet or exceed industry standards, and can easily be integrated and operated in any size earth station.

Fred Kornberg, President and Chief Executive Officer of Comtech Telecommunications Corp. said, "We were awarded this follow-on order based on our field-proven technologies and consistently high level of customer support."

Comtech EF Data Corp. is the recognized global leader in satellite bandwidth efficiency and link optimization. The advanced communication solutions encompass the Advanced VSAT Solutions, Modems, RAN & WAN Optimization, Managed Bandwidth and RF products. The Company is recognized as a technology innovator, and has a reputation for exceptional product quality and reliability. The solutions enable commercial and government users to reduce OPEX/CAPEX and to increase throughput for fixed and mobile/transportable satellite-based applications. For more information, visit [www.comtechefdata.com](http://www.comtechefdata.com).

Comtech Telecommunications Corp. designs, develops, produces and markets innovative products, systems and services for advanced communications solutions. The Company believes many of its solutions play a vital role in providing or enhancing communication capabilities when terrestrial communications infrastructure is unavailable, inefficient or too expensive. The Company conducts business through three complementary segments: telecommunications transmission, RF microwave amplifiers and mobile data communications. The Company sells products to a diverse customer base in the global commercial and government communications markets. The Company believes it is a market leader in the market segments that it serves.

Certain information in this press release contains statements that are forward-looking in nature and involve certain significant risks and uncertainties. Actual results could differ materially from such forward-looking information. The Company's Securities and Exchange Commission filings identify many such risks and uncertainties. Any forward-looking information in this press release is qualified in its entirety by the risks and uncertainties described in such Securities and Exchange Commission filings.
