TeleCommunication Systems Receives \$19 Million Delivery Order from U.S. Army for SNAP Deployable Satellite Systems Equipment and Support

Note: Comtech Acquired TCS on 2/23/2016

ANNAPOLIS, Md., Aug. 1, 2012 /PRNewswire/ -- TeleCommunication Systems, Inc. (TCS) (NASDAQ: TSYS), a world leader in highly reliable and secure [mobile communication technology](#), today announced that it has received a new \$19 million delivery order from the U.S. Army for equipment, field services support and maintenance of Secret Internet Protocol Router and Non-secure Internet Protocol Router Access Point (SNAP) Very Small Aperture Terminal (VSAT) satellite systems. The funding is the result of a successful bid on a task order for satellite communications equipment and support from the U.S. Army Communications-Electronics Command.

The order is initially funded at \$700 thousand and will be funded up to a total of \$19 million if the options are fully exercised. This new order will provide the U.S. Army with equipment and support for TCS' SNAP deployable communications products. The U.S. Army Project Manager for the Warfighter Information Network - Tactical (PM WIN-T) Commercial Satellite Terminal Program is funding these procurements through the Army's \$5 billion World-Wide Satellite Systems (WWSS) contract vehicle.

"The U.S. armed forces need satellite communications systems that are easily deployed, secure and reliable," said Michael Bristol, senior vice president and general manager of government solutions for TCS. "TCS' SNAP VSAT satellite systems equipment meets these criteria and can help our military succeed."

The TCS SNAP VSAT systems provide multimedia communications capabilities which convey encrypted voice, video and data. TCS SNAP products are highly transportable and ruggedized, and have a graphical user interface that facilitates easy set-up and operation. The modularity and plug-and-play interfaces between all radio frequency (RF) and baseband configurations inherent in the SNAP product line result in communication solutions tailored to the end-user's specific needs.

About TeleCommunication Systems, Inc.

TeleCommunication Systems, Inc. (TCS) (NASDAQ: TSYS) is a world leader in highly reliable and secure mobile communication technology. TCS infrastructure forms the foundation for market leading solutions in E9-1-1, text messaging, commercial location and deployable wireless communications. TCS is at the forefront of new [mobile cloud computing](#) services providing wireless applications for navigation, hyper-local search, asset tracking, social applications and telematics. Millions of consumers around the world use TCS wireless apps as a fundamental part of their daily lives. Government agencies utilize TCS' cyber security expertise, professional services, and highly secure deployable satellite solutions for mission-critical communications. Headquartered in Annapolis, MD, TCS maintains technical, service and sales offices around the world. To learn more about emerging and innovative wireless technologies, visit www.telecomsys.com.
