TeleCommunication Systems and ATX Group Collaborate to Provide Enhanced Dynamic Route Guidance

Note: Comtech Acquired TCS on 2/23/2016

NOVI, MI, Jun 08, 2011 -- Telematics Detroit 2011 -- TeleCommunication Systems, Inc. (TCS) (NASDAQ: TSYS), a world leader in highly reliable and secure mobile communication technology, today announced that ATX Group (ATX), a leading provider of customized connected vehicle (or telematics) services to global automobile manufacturers, has chosen TCS as a navigation and location-based services (LBS) partner to deliver enhanced turn-by-turn navigation assistance with the upcoming Hyundai Blue Link™ program.

"As telematics continues to evolve, the importance of off board, vehicle-based and mobile capabilities are becoming more critical for an enhanced consumer experience," said Tom Metzger, senior vice president and general manager of Connected Vehicle Solutions for ATX. "We are pleased to work with TCS in the development of this offboard solution for turn-by-turn services."

TCS will deliver location-based solutions that leverage the integration of smart phones and in-vehicle systems. These hybrid solutions improve today's mobile applications by providing user interface options that are optimized for both ease of use and safety and by giving users the option of integrating vehicle sensor input into the telematics system. Compared to today's in-car solutions, hybrid operation offers improved access to real-time location-aware content and a broad array of constantly updated applications. When combined with ATX's cloud-based connected car functionality, these enhanced features offer a range of services for OEMs, car manufacturers and content providers looking for comprehensive telematics solutions.

"At TCS, we are committed to delivering unsurpassed embeddable navigation and content for mobile and automotive products for innovative Tier 1 automotive suppliers like ATX," said Steve Petilli, senior vice president of TCS' navigation and telematics group.

TCS, a pioneer developer of the world's first wireless location platform, offers complete end-to-end LBS solutions that include branded and white-label navigation and finder applications, infrastructure, mapping, and content for leading consumer brands, content providers, voice service providers, OEMs, automotive customers and more than 60 mobile operators worldwide. TCS' LBS and telematics platforms deliver location-centric information to people on the move, offering continuous access to local directories, maps, directions, and more. TCS' applications are available on QNX, iPhone, BlackBerry, Android, Symbian, J2ME, BREW, and Windows Mobile.

About ATX

With operations in Dallas-Fort Worth, Texas and subsidiary offices in Dusseldorf, Germany and Paris, ATX (<http://www.atxg.com/>) is one of the world's leading providers of connected vehicle services to global automobile manufacturers. ATX services, among the first to be launched in the consumer vehicle market in 1996, are provided to vehicle owners through the brand names of its customers: Hyundai, Toyota, Lexus, BMW, PSA Peugeot Citroen, and Rolls-Royce Motor Cars. Services by ATX provide enhanced safety, security and driving convenience to vehicle owners, and help automobile manufacturers and their affiliated dealerships use telematics data and multiple customer contact channels to reduce costs, enhance vehicle servicing, and more closely manage customer relationships and contacts with the vehicle through its lifetime. ATX is a division of Cross Country Automotive Services (www.crosscountry-auto.com), a leading provider of roadside assistance programs in the U.S. on behalf of global automobile manufacturers and U.S. insurance carriers. Cross Country provides solutions for the nearly 6 million roadside service events experienced by their consumers each year. In addition, Cross Country provides accident scene management, vehicle release management and total loss screening services for insurance carriers, and customer care services for a number of automotive manufacturers.

About TeleCommunication Systems, Inc.
