Comtech Telecommunications Corp. Receives \$9.1 Million Order to Upgrade Cellular Backhaul Infrastructure

MELVILLE, N.Y., Jun 11, 2007 (BUSINESS WIRE) -- Comtech Telecommunications Corp. (Nasdaq: CMTL), a leading provider of products, systems and services for advanced communications solutions, today announced that its Montreal, Canada-based operation, Memotec, Inc., received a \$9.1 million order to provide communications equipment and services to a major 2G/3G mobile telecommunications service provider in Africa. The equipment will be used to increase the existing link capacity of the mobile operator's access and core transmission network, connecting media gateways and base station equipment. The Memotec solution will reduce the operating expenses through increased bandwidth efficiencies for the service provider, while offering a more cost-effective alternative for expanding capacity compared to traditional upgrade solutions.

The equipment consists of Memotec's next generation mobile voice and data compression product, the CX-U 1000. The CX-U 1000 uniquely combines GSM/CDMA mobile network access optimization and DCME voice compression features together into a single, compact, carrier-grade unit. Featuring hot-standby redundancy with zero service down time, sophisticated monitoring functions, and the highest traffic compression ratio in the industry, the CX-U1000 delivers the level of carrier-grade features mobile operators require.

"This order confirms Comtech's leadership position in the cellular backhaul compression market and demonstrates customer confidence in our ability to service and deliver carrier-grade, world-class infrastructure solutions to leading mobile operators," said Fred Kornberg, President and Chief Executive Officer of Comtech Telecommunications Corp.

Comtech Telecommunications Corp. designs, develops, produces and markets innovative products, systems and services for advanced communications solutions. The Company believes many of its solutions play a vital role in providing or enhancing communication capabilities when terrestrial communications infrastructure is unavailable or ineffective. The Company conducts business through three complementary segments: telecommunications transmission, mobile data communications and RF microwave amplifiers. The Company sells products to a diverse customer base in the global commercial and government communications markets. The Company believes it is a market leader in the market segments that it serves.

Memotec, Inc., a subsidiary of Comtech EF Data Corp., is a leading supplier of cellular GSM and telephony backhaul optimization solutions. With products deployed in over one hundred countries around the world in both satellite and terrestrial networks, Memotec's solutions are proven globally. Please visit www.memotec.com for more information.
