## Comtech Telecommunications Corp. Awarded \$1.4 Million Order to Supply Equipment for Ongoing Mobile Network Expansion in Latin America

MELVILLE, N.Y.--(BUSINESS WIRE)-- April 9, 2014--Comtech Telecommunications Corp. (NASDAQ:CMTL) announced today that its Tempe, Arizona-based subsidiary, Comtech EF Data Corp., was awarded a \$1.4 million order to supply infrastructure equipment. A mobile network operator in Latin America will utilize the equipment to support an ongoing network expansion project.

The order specified the [CDM-625 Advanced Satellite Modems](#), which are utilized by operators globally to power satellite mobile backhaul. The Modems combine advanced forward error correction with DoubleTalk<sup>®</sup> Carrier-in-Carrier<sup>®</sup> bandwidth compression to provide maximum savings. DoubleTalk<sup>®</sup> Carrier-in-Carrier<sup>®</sup> is based on Raytheon Applied Signal Technology's patented "Adaptive Cancellation" technology, which allows transmit and receive carriers of a duplex link to share the same transponder space. The optional Packet Processor for the CDM-625 was also ordered. It will enable efficient IP networking and transport over satellite by adding routing capability with very low overhead encapsulation, header compression, payload compression and Quality of Service ("QoS"). The advanced QoS combined with header and payload compression ensures the highest quality of service with minimal jitter and latency for real-time traffic, priority treatment of mission-critical applications and maximum bandwidth efficiency.

Additionally, RF products were included in the order, specifically the [CSAT-5060 C-Band Transceivers](#) and the [HPOD High-Power Outdoor Amplifiers](#). These products are examples of Comtech EF Data's rugged and feature-rich outdoor ground station equipment that are ideal for deployment in harsh environments.

Fred Kornberg, President and Chief Executive Officer of Comtech Telecommunications Corp. commented, "This mobile network operator is relying on Comtech equipment to support its ongoing network expansion based on our proven ability to facilitate sustainable and profitable connectivity. The combination of our technologies will enable the operator to expand service offerings and to extend mobile backhaul to rural and remote regions."

Comtech EF Data Corp. is the recognized global leader in satellite bandwidth efficiency and link optimization. The advanced communication solutions encompass the Advanced VSAT Solutions, Modems, RAN & WAN Optimization, Network & Bandwidth Management and RF products. The Company is recognized as a technology innovator, and has a reputation for exceptional product quality and reliability. The solutions enable commercial and government users to reduce OPEX/CAPEX and to increase throughput for fixed and mobile/transportable satellite-based applications. For more information, visit [www.comtechedata.com](http://www.comtechedata.com).

Comtech Telecommunications Corp. designs, develops, produces and markets innovative products, systems and services for advanced communications solutions. The Company believes many of its solutions play a vital role in providing or enhancing communication capabilities when terrestrial communications infrastructure is unavailable, inefficient or too expensive. The Company conducts business through three complementary segments: telecommunications transmission, RF microwave amplifiers and mobile data communications. The Company sells products to a diverse customer base in the global commercial and government communications markets. The Company believes it is a market leader in the market segments that it serves.

Certain information in this press release contains statements that are forward-looking in nature and involve certain significant risks and uncertainties. Actual results could differ materially from such forward-looking information. The Company's Securities and Exchange Commission filings identify many such risks and uncertainties. Any forward-looking information in this press release is qualified in its entirety by the risks and uncertainties described in such Securities and Exchange Commission filings.
