Comtech Telecommunications Corp. Received \$3.5 Million Order for SATCOM Infrastructure Equipment for Deployment in Government Network

MELVILLE, N.Y.--(BUSINESS WIRE)-- December 8, 2014 -- Comtech Telecommunications Corp. (NASDAQ:CMTL) announced today that its Tempe, Arizona-based subsidiary, Comtech EF Data Corp., received a \$3.5 million order, in October 2014, for satellite communications infrastructure equipment. The equipment will be deployed in a government network.

The order includes a range of RF products. A recognized industry leader in RF products, Comtech EF Data offers an extensive product line of frequency conversion and amplifier solutions for indoor and outdoor environments. The products are cost-effective and provide the field-proven performance and reliability required to support satellite communications in fixed, mobile and transportable applications.

The RF products integrate with Comtech EF Data's [NetVue™](#) Integrated Management System, which provides the network insight required to run optimal networks. NetVue™ features a single intuitive graphical user interface that acts as a user friendly front-end to monitor and control network equipment. It features a robust, comprehensive network management and analytics engine that allows users to intelligently maximize resources, ensure network uptime and provide the elevated levels of service that are required to support fixed and remote sites in the field.

Fred Kornberg, President and Chief Executive Officer of Comtech Telecommunications Corp., commented on the order, "This customer selected the Comtech solution based on our proven reliability and performance."

Comtech EF Data Corp. is the recognized global leader in satellite bandwidth efficiency and link optimization. The advanced communication solutions encompass the Advanced VSAT Solutions, Modems, RAN & WAN Optimization, Network & Bandwidth Management and RF products. The Company is recognized as a technology innovator, and has a reputation for exceptional product quality and reliability. The solutions enable commercial and government users to reduce OPEX/CAPEX and to increase throughput for fixed and mobile/transportable satellite-based applications. For more information, visit www.comtechedata.com.

Comtech Telecommunications Corp. designs, develops, produces and markets innovative products, systems and services for advanced communications solutions. The Company believes many of its solutions play a vital role in providing or enhancing communication capabilities when terrestrial communications infrastructure is unavailable, inefficient or too expensive. The Company conducts business through three complementary segments: telecommunications transmission, RF microwave amplifiers and mobile data communications. The Company sells products to a diverse customer base in the global commercial and government communications markets. The Company believes it is a leader in most of the market segments that it serves.

Certain information in this press release contains statements that are forward-looking in nature and involve certain significant risks and uncertainties. Actual results could differ materially from such forward-looking information. The Company's Securities and Exchange Commission filings identify many such risks and uncertainties. Any forward-looking information in this press release is qualified in its entirety by the risks and uncertainties described in such Securities and Exchange Commission filings.
