Comtech Telecommunications Corp. Receives \$2.2 Million Contract to Provide Troposcatter Systems to the Swedish Armed Forces

MELVILLE, N.Y.--(BUSINESS WIRE)-- November 2, 2016 - Comtech Telecommunications Corp. (Nasdaq:CMTL) announced today that during its first quarter of fiscal 2017, its Orlando, Florida-based subsidiary, Comtech Systems, Inc., which is part of Comtech's Government Solutions segment, received a \$2.2 million contract from the Swedish Defense Material Administration (FMV) to supply it with deployable troposcatter systems for the Swedish Armed Forces (SwAF). This contract follows a multi-year evaluation of commercial off-the-shelf (COTS) Comtech troposcatter products. The evaluation included rigorous field-testing in a variety of operational environments, including high northern latitudes. The COTS Comtech troposcatter products were later modified to meet Swedish Armed Forces standards and requirements. These systems will be used by the military for rapidly deployable communications.

Comtech will be supplying the MTTs deployable troposcatter terminals customized to meet the specific requirements of the Swedish Armed Forces. The MTTs is the most advanced integrated troposcatter system available in the world and utilizes Comtech's CS67500 50 Mb/s troposcatter modem, CS4400 Frequency Converter System, and 500W SSPAs to provide a quad diversity performance in a modular, highly deployable package. Comtech was awarded this contract due to its superior equipment offering and large base of installed and operating troposcatter systems and equipment.

Fred Kornberg, President and Chief Executive Officer of Comtech Telecommunications Corp., commented, "This contract highlights the growing need of militaries around the world to augment their existing communications toolkits with high-bandwidth, long range alternatives to satellite communications in order to enable critical communication links under a wide variety of operational scenarios. Comtech is honored to have been selected to provide this unique capability to FMV due to our unmatched experience in the development and deployment of troposcatter technology."

Comtech Systems, Inc. (www.comtechsystems.com) is part of Comtech's Government Solutions segment and specializes in system design, integration, supply and commissioning of turnkey communication systems including troposcatter, line-of-sight microwave and satellite.

Comtech Telecommunications Corp. designs, develops, produces and markets innovative products, systems and services for advanced communications solutions. The Company sells products to a diverse customer base in the global commercial and government communications markets.
